### **GOALS FOR MY CARE**

People see health care practitioners for a variety of reasons. Some go for relief of pain, some to correct the cause of pain and others to correct whatever the core malfunction may be. Your practitioner will weigh your needs and desires when recommending your program of care. Please check the type of care desired so that we may be guided by your wishes.

O Relief Care: Symptomatic relief of pain or discomfort

O Corrective Care: Correcting and relieving the cause of the problem as well as the symptoms

O Comprehensive Care: Address the entire system and bring your body to the highest state of health possible.

Any other goals you'd like to share?
